WORK EXPERIENCE

Hyundai Motor America

September 2025 - Present

Business Data Analyst – Lead Management

- Establish and maintain processes for collecting, cleansing, and automating analysis of marketing and business data to generate actionable insights.
- Analyze and manage marketing, website, and operational data using Excel, Power BI, and Tableau to support campaigns and decision-making.
- Design and implement data visualization methods to effectively communicate performance trends, forecasts, and hidden patterns to stakeholders.
- Develop and deploy predictive models and advanced statistical analyses to optimize campaign effectiveness, customer engagement, and broader business strategy.

The Lundquist Institute for Biomedical Innovation at Harbor-UCLA Medical Center

April 2022 - Present

Junior Biostatistician

- Generate publication-ready graphs and plots using R programming, aligning outcomes with study criteria.
- Conduct descriptive and inferential analyses, including mixed model LSMeans, correlation matrices, and significance testing (Pearson/Spearman).
- Collaborate with research team and lead biostatistician to refine analyses and meet publication standards.
- Extract and analyze longitudinal data to compute change scores, correlation matrices, and heat maps for multivariate outcomes.

Data Manager

- Design, test, and maintain study databases in REDCap to support multi-center clinical trials.
- Optimize Case Report Forms (CRFs), ensuring compliance with study protocols.
- Conduct data monitoring, queries, and quality control to ensure data accuracy and integrity.
- Author data collection and management sections in the Manual of Operations and Procedures (MOP).
- Manage and maintain an audio-visual data system to streamline trial workflows.

Research Assistant

- Managed participant data in LiveTrial EDC, ensuring accuracy and compliance with research protocols.
- Supported study coordinators with data entry, query resolution, and reporting.
- Collaborated with Principal Investigators in team meetings to assess adverse events (AEs) and refine study strategies.

Beltways

January 2024 - May 2024

Marketing and Design Consultant

- Co-authored a comprehensive marketing plan for the launch of the world's first modular accelerating walkway, including target market research, positioning, and promotional strategy.
- Designed visual assets and supported SEO and content strategy to strengthen Beltways' online presence, contributing to over 250M+ social media views since launch.
- Developed creative promotional opportunities and experiential marketing concepts to drive public interest and establish Beltways as a leader in sustainable transportation innovation.

iD Tech Camps

February 2022 - May 2022

Instructor

- Taught coding (Java, Python, JavaScript), business strategy (Marketing, Startups, Entrepreneurship), game design, and creative media to students.
- Delivered engaging, project-based lessons in Unity, Adobe Creative Suite, and YouTube content creation (Animation, Design, Storytelling).
- Mentored students in applying technology skills to real-world and career-driven projects.

Camp Izza

September 2021 - March 2022

Product Owner

- Led agile project management as Product Owner, coordinating a cross-functional team to build Camp Izza's registration platform.
- Defined system requirements with stakeholders and oversaw feature implementation.
- Contributed to backend (MySQL, Python, Flask, Google Cloud SQL) and frontend (TypeScript, ReactJS, Firebase) development.

UI/UX Designer

- Designed responsive UI/UX mockups in Figma for admin, counselor, parent, and camper dashboards.
- Increased website traffic by 200% post-launch with improved navigation and user experience.
- Collaborated using Discord, Trello, GitHub, and VSCode LiveShare for agile team development.

The Lundquist Institute for Biomedical Innovation at Harbor-UCLA Medical Center

June 2018 - August 2018

Intern

- Supported REDCap survey design with branching logic, survey queues, and online designer tools.
- Migrated patient records into LiveTrial EDC for clinical studies.
- Designed recruitment flyers and a research website; secured IRB approval for compliance.

EDUCATION

University of Southern California (GPA: 3.95)

January 2023 - December 2024

- Master of Science in Integrated Design, Business, and Technology (Innovation and Entrepreneurship)

University of California, Irvine (GPA: 3.81)

September 2019 - March 2022

- Bachelor of Science in Information and Computer Science: Informatics (Specialization: Organizations and Information Technology), Minor in Humanities: Film and Media Studies
- President, Social Media Manager, and Video Editor for VocaLotus A Cappella

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, R, HTML/CSS, JavaScript, TypeScript
- **Databases:** REDCap, LiveTrial EDC, SQL, MySQL/MariaDB, Firebase, Google Cloud SQL
- **EHR Systems:** Cerner
- **Frameworks & Tools:** Flask, ReactJS, AngularJS, Ionic
- **Statistics & Analysis:** Probability and Statistics in R, Information Retrieval, Software Testing, Quality Assurance, Boolean Logic, Discrete Structures
- **Version Control & Workflow:** Git, GitHub, Agile/Scrum, Trello, VSCode LiveShare, MS Office (Excel, Word, PowerPoint)

DESIGN SKILLS

- **UI/UX & Web:** Web & Software Design, Wireframing, Prototyping, Human-Computer Interaction (HCI), Information & Data Visualization
- **Creative & Media:** Graphic Design, Motion Graphics, Animation, Game Design
- **Design Tools:** Figma, Adobe Photoshop, Adobe Lightroom, Adobe Illustrator, Adobe Premiere, Adobe After Effects, Final Cut Pro X, Davinci Resolve

BUSINESS MANAGEMENT SKILLS

- **Project Management:** Agile product management, sprint planning, scope management, Work Breakdown Structures (WBS), Gantt Charts
- **Leadership:** Led cross-functional teams as Product Manager & Product Owner, overseeing feature development and iterative testing for adaptability and efficiency
